Fine Pecan Trees

Nov 1914

Jefferson County, Florida is the home of the pecan and Monticello is the greatest shipping point in the pecan belt for fine budded or grafted pecan nursery stock.

I do not advise large plantings of pecan trees, unless you are going to make it your regular business, but I do advise planting a few trees of choice varieties which with proper care will pay big profits in 6 to 7 years from planting.

Twenty trees will plant ~~five~~ ^{one} acre. One hundred trees will plant five acres. A half dozen or a dozen trees will ornament your home place and pay taxes, repairs and something over in a very few years.

I have unsold at present 1000 trees that have been inspected and pronounced free from all fungous or insect troubles. Let me make you an assortment of 10, 20, 100 (or more), trees from the following varieties, Schley, Stuart, Moore, Delmas, and Moneymaker, 2 to 3 foot trees 40 cents each or \$35 per hundred. Three to four foot trees 50 cents each or \$45 per hundred. Four to six foot trees 60 cents each or \$55 per hundred. An order of 50 trees will be accepted at the hundred rate. These trees will be carefully dug, packed in moist sphagnum moss and sent to your address at time desired during planting season.

You can safely permit me to make selections for you if you are not familiar with the varieties.
